

**ASTER MEDCITY KOCHI**  
**VEEG REPORT**

**PATIENT INFORMATION**

NAME	: SIYA SANAL	SEX	: Female
UH ID NO	: 300269269	EEG NO	: 13/'24
AGE	: 5 Years	STUDY DATE	: 13/08/2024
		SECTION	: OPD

**Classification:**

Sleep - No activation.  
Awake - Technically difficult  
EKG - Normal  
No events were recorded.

**Interpretation:**

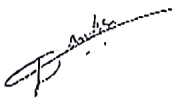

This prolonged 8 hours VEEG recording did not show any epileptiform abnormalities. No events were recorded.

**Body of Report:**

Child was sedated and asleep during the initial and major part of the recording. Symmetric and synchronous sleep patterns were seen. Awake record was technically difficult due to frequent myogenic and movement artifacts, however brief awake showed background activity of 8 Hz over bilateral posterior head regions, bilaterally symmetric and synchronous. Hyperventilation could not be performed. Photoc stimulation did not produce any abnormalities. No definite epileptiform abnormalities were noted.

EKG: 84 bpm.
