DISCHARGE SUMMARY

Name : B/O ANJU Address : C/O JESWIN JOSEPH MANJALY (H) YCA, NEELEESWARAM KALADY Age :NB Sex : MALE Hosp. No :EW-2320 B wt : 1.740kg	D O B :08/02/2020 at 10.45pm D O A : 08/02/2020 D O D : 09/03/2020
DIAGNOSIS : Preterm (32 week+4/7 days)/Male/AGA(1.740kg)/ -HIE stage 1 /RDS -Surfactant given -On ventilator x 48 hours -On nasal CPAP X48 Hours -FFP and IVIG given -B/L DDH	Discharge weight:-2.080kg Discharge H.C :33 cm

CLINICAL HISTORY:-

A single live preterm male neonate with weight 1.740kg was delivered via emergency LSCS (Transverse lie) on 8/2/2020 at 10.45pm to a 34 yrs G2P1L1 with preterm labour pain and received 2 doses of inj.Betnesol .Neonate did not cry at birth required active resuscitation at birth .Baby was admitted to NICU with respiratory distress,had bruises all over . Hence surfactant was administered and connected to mechanical ventilator (x 48 hours)followed by nasal CPAP (X 48 hours).In view of presumed sepsis,FFP was transfused and antibiotics hiked .OG feeds was started on day 3 of life ,gradually increased and changed to NG feeds and direct breast feeds .Baby was shifted to D2NICU on day 19 of life . NSG done showed features S/O PVL (Grade 1).USG hip done,and orthopedic consultation awaited and advised to placed neonate in prone position with double diaper and to review after 1 month .ROP Screening done and is on follow up .At discharge (day 30),active,feeding well,gaining weight and hemodynamically stable.

TREATMENT:-

- > Inj. Calcium
- > Inj. Lasix
- > Inj. Meropenem
- > Inj. Hydrocort
- > IV bolus calcium 1.5ml+2.5ml NS
- > Inj. Caffiene
- > FFP given
