

**ASTER MEDCITY KOCHI**  
**VEEG REPORT**

**PATIENT INFORMATION**

NAME	: ADITHYA ASOBH KULAPPURATHU	SEX	: Male
UH ID NO	: 300622395	EEG NO	: 04 /'24
AGE	: 6 Years	STUDY DATE	: 03/04/2024
		SECTION	: OPD

**Classification:**

Awake – Technically difficult  
Sleep - No activation  
EKG - Normal  
No events were recorded.

**Interpretation:**

This prolonged 8 hours VEEG recording did not show any epileptiform abnormalities. No events were recorded.

**Body of Report:**

Child was sedated and asleep during the initial and major part of the recording. Symmetric and synchronous sleep patterns were seen. Awake record was technically difficult due to frequent movement and myogenic artifact, however showed a background activity of 6 Hz over bilateral posterior head region bilaterally symmetric and synchronous. Hyperventilation could not be performed. Photoc stimulation did not produce any abnormalities. No definite epileptiform abnormalities were noted.

EKG: 84 bpm.
